Introduction of AI to Support Lesson Planning and Resourcing at Ravenscote

Dear Parents and carers,

I am writing to inform you about an exciting development here at Ravenscote. As part of our commitment to provide the best possible educational experience for our children, we will be implementing Artificial Intelligence (AI) to support lesson planning and resourcing of the Connected Curriculum.

Purpose of AI in our School

The introduction of AI in our school is aimed at enhancing the overall teaching and learning experience. By utilising this technology, our teachers will have access to a vast database of resources and educational materials. AI will assist teachers in their lesson planning process, allowing them to create engaging and targeted lessons that are tailored to meet the individual needs of all of our children. With the aid of AI, our teachers will be better equipped to adapt their teaching approaches and cater to the unique learning styles of our children.

Limitations of AI

It is important to note that AI will not replace the role of our dedicated teachers. The use of AI is intended to complement their expertise, not substitute it. The technology will act as a powerful tool that guides and supports our teachers in their decision-making processes, providing them with valuable insights and recommendations. All resources or teaching materials produced by teachers, that are supported by the use of AI, will be reviewed to ensure that they have factual accuracy and support the teaching of the intended knowledge and skills.

Our Commitment to Quality Education

At Ravenscote, we are committed to providing a high-quality education that nurtures the growth and development of our students. By incorporating AI into our teaching practices, we are embracing innovation and staying at the forefront of educational advancements.

We are confident that the introduction of AI for lesson planning and resourcing will empower our teachers, improve our ability to meet the diverse needs of our children and ultimately enhance the Connected Curriculum and the overall teaching and learning experience at Ravenscote.

We have written an AI policy which has been reviewed and approved by the school Governors and within this policy we have permitted the use of 'TeachMateAI' as the sole AI software the teachers will access. You can view the full policy on our website (here).

We appreciate your ongoing support and partnership in providing the best education for your children. Should you have any questions or concerns, please do not hesitate to contact the school office.

Best wishes,

A Wells
