

Online Safety Overview

In this digital age, where technology is integral to our lives, it is more important than ever to equip our students with the knowledge and skills to navigate the online world safely and responsibly. At Ravenscote, we prioritise the safety and well-being of our students, both offline and online, which is reflected in our robust approach to online safety education. We understand that technology is continually evolving and therefore our overview, at times, may need to change in accordance with these changes, current topics of interest and concerns of parents.

Computing Curriculum	Every computing lesson includes an Online Safety activity focusing on a scenario and the Four C's.
PSHE Curriculum	We have liaised with the PSHE subject lead and integrated online safety into relevant PSHE lessons.
Assemblies	There will be one year group assembly per half term that focuses on an area of Online Safety.
Parent Communication	Every week, there will be a tweet on the school Twitter account with useful information on how parents can support children in the online world. There will be an element of reactivity to current topics or issues where information will be shared. There will be links on the website to direct parents to useful sites for further support. Parents will be invited to attend an annual Online Safety Talk with a guest speaker.
Whole School	As a minimum we will have a whole school online safety day during the nationwide 'Safer Internet Day'.
Display	In the Computing Suite, there will be an online safety display with key reminders for children that will be used regularly in lessons.
