17th September, 2025

Dear Parents and Guardians,

As part of our ongoing commitment to providing a progressive and relevant educational experience, we would like to inform you about the integration of Artificial Intelligence (AI) into our school curriculum. AI – including Generative AI, is used to create new content — this can include images, text and even music — in response to a prompt in a human-like way.

This year, children in years 4 and 6 will be engaging with the topic of AI within their computing lessons and the whole school will be discussing the benefits and disadvantages of its use during online safety lessons - providing them with an understanding of what AI is and how it impacts various aspects of daily life.

In addition to students' learning, our staff have begun utilising AI tools in various administrative tasks and to help support planning, feedback and communication. We understand that the introduction of AI into the classroom may raise questions or concerns. We would like to reassure you that we do not use children's personal data in any of the AI tools used at Ravenscote.

The below links are great resources to refer to should you wish to discuss AI further with your children.

If you have any questions or require further clarification regarding our AI initiatives, please do not hesitate to contact the school at info@ravenscote.surrey.sch.uk.
