### What's Inside?

- Internet Safety Glossary
- Online Safety Support for Neurodivergent Children
- Top Tips for Setting Up Parental Controls on Devices
- Top Tips for a Tech Free Christmas

### Internet Safety Glossary

Are you CHEUGY? Do you know your AR from your ASMR? What about BLOATWARE and BUSSIN, or even GRIEFING?

Internet slang seems to constantly change, but Internet Matters have put a handy guide together. This could be a fun family game, seeing who knows or who can guess.

Follow the link below to access the guide –

[Glossary for internet safety and terms | Internet Matters](#)

### Online Safety Support for Neurodivergent Children

Online scams like trust trades and fake giveaways can cause harm and upset to all children, but neurodivergent children are at greater risk of falling victim to scams.

Internet Matters have worked with Ambitious about Autism and Roblox to create new resources to help families with neurodivergent children learn and stay safe from scams within games.

There's a guide for parents, a video for children and young people, plus stories for families to read and discuss together to explore the risks, with practical actions for children to take to help stay protected.

All the resources can be accessed by following the link below –

# TOP TIPS

At National Online Safety, we believe in empowering parents, carers and trusted adults with the information to hold an informed conversation about online safety with their children, should they feel it is needed. This guide focuses on one of many issues which we believe trusted adults should be aware of. Please visit [nationalcollege.com](http://nationalcollege.com) for further guides, hints and tips for adults.

## Top Tips for SETTING UP PARENTAL CONTROLS ON NEW DEVICES

In children's eagerness to start enjoying new digital gadgets immediately, it can be easy to overlook setting up the type of parental controls that can help to protect them online. If you don't sort those out from the very start, it can be an uphill battle – technologically and psychologically – to impose such controls later. Here's our rundown of what to look for when setting up the various internet-enabled devices that might be lurking under the tree at this time of year.

### IPHONE

If your child's lucky enough to be getting their own iPhone, parental controls can help avoid issues like screen addiction and unsuitable content. Go into the settings and scroll down to 'Screen Time'. From here you can customise important settings including time limits on using the device, communication restrictions and content blockers. You can also lock your changes behind a passcode.

### ANDROID

With Android devices, Google's Family Link app is your friend. You'll need a Google account – and a separate one for your child, which you should use when first setting up the device. Then, in Family Link on your own device, select 'Add Child' and enter their account details. This lets you specify limits on daily usage, restrict certain apps, block particular content and more.

### PLAYSTATION

You can prep for a PlayStation before it's even unwrapped. At [my.account.sony.com](http://my.account.sony.com), create an account, then go to Account Management > Family Management > Add Family Member to set up your child's account, which you'll use to sign in on the console. You can restrict the age ratings of the games they can play and who they can talk to. On the PS5, you can make exceptions for any games you think are acceptable despite their high age rating.

### IPAD

iPad parental controls are identical to those on iPhones. However, if you've got a shared family iPad and want to ensure your children aren't seeing anything age-inappropriate after you hand them the device, there's a feature called Guided Access (under Settings > Accessibility > Guided Access). With this switched on, young ones can only use the app that's currently open.

### XBOX

The Xbox Family Settings app helps you manage which games your child can play (and when). You'll need to set up the console with your own account and then add a child profile. Make sure your account's password protected, so your child can't alter your choices later. You'll be walked through the functions at setup, but you can also reach them manually via Settings > Account > Family Settings.

### NINTENDO SWITCH

Download the Nintendo Switch Parental Controls app on your phone, and you'll be shown how to link it to the console. Once that's done, you can limit how long your child can play each day, decide what age ratings are permitted and more. You'll also get weekly updates on how often they've used the device. These controls are accessible through the console itself, but the app is usually easier.

### WINDOWS 11 PCS

On Windows 11, account management is key. Set up the device with your own account as the admin. Then go to Settings > Accounts > Family and Other Users and create your child's account (if you've already done this on a previous PC, just log in with those details). Microsoft Family Safety (either the app or the site) then lets you control screen time, what content children can view and more.

### CHROMEBOOKS

Chromebooks' parental controls are managed via the Family Link app. Unlike an Android device, however, you need set up the Chromebook with your own account first, then add your child's. Go to Settings > People > Add Person and input your child's Google account details (or create a new account). Your child can then log in, and you can monitor what they're up to via Family Link.

### MACS

Like iPhones, parental controls for Macs are managed via the Screen Time settings. Again, the crux here is to set yourself up as the administrator before adding any child accounts. In the settings, look for Users & Groups to create your child's account, then – while on their profile – use the screen time options to place any boundaries around apps, usage and who your child can communicate with (and vice versa).

### SMART TVs

Smart TVs typically have their own individual parental controls. One of the most popular brands is Samsung – and on their TVs, you can control the content available to your child. In the Settings menu, under 'Broadcasting', you can lock channels and restrict content by its age rating. Even this isn't foolproof, however: some apps (like YouTube) might still let children access unsuitable material.

### Meet Our Expert

Barry Collins is a technology journalist and editor with more than 20 years' experience of working for titles such as the Sunday Times, Which?, PC Pro and Computeractive. He's appeared regularly as a tech pundit on television and radio, including on BBC Newsnight, Radio 5 Live and the ITV News at Ten. He has two children and writes regularly on the subject of internet safety.

# Top Tips for a TECH-FREE CHRISTMAS

It can be difficult to stay away from technology and devices, and sometimes this means that people – of any age – can find it hard to be present in the moment. As a period when families are able to spend some quality time together and enjoy each other's company, Christmas is the perfect opportunity to step away from our phones, laptops and consoles and concentrate on the things that really matter. Follow our top ten tips for a tech-free festive period and make the most of this holiday season. Merry Christmas!

## 1. BOARD GAMES CAN BE FUN (HONEST)

OK, no one wants a repeat of that incident when your youngest had to pay triple rent on Mayfair, but going back to basics with a card or board game can be a fantastic bonding experience. Choose a game that even the youngest members of your family can enjoy and have a fun tech-free time.

## 2. MAKE YOUR OWN DECORATIONS

Spending time on arts and crafts is a brilliant way to relax and spend some productive time offline. Making your own Christmas decorations as a family can become a wholesome tradition and leave you with some treasured mementos, too.

## 3. GO FOR A WINTER WALK

Not much beats wrapping up warm on a crisp December day and taking a stroll. Whether alone or with the family, a walk is a fantastic way to clear your head and relish the break from hectic normal life. As an extra festive treat, why not make a flask of hot chocolate to take with you?

## 4. BAKE SOME FESTIVE TREATS

Not all Christmas cooking has to be a stressful chore that's timed with military precision. Baking some simple festive treats like cookies doesn't have to take hours – and will make sure you're stocked up on tasty things to offer any friends or family members who pop round.

## 5. READ A FAMILY STORY TOGETHER

Turn story time into an event. Make the living room or bedroom into a tech-free space, light some candles, make some hot drinks and reach for a classic Christmas tale. It's a fantastic way to relax before bed, and the right story will help to get the whole family into the festive spirit.

## 6. TURN OFF NOTIFICATIONS

It sounds obvious, but turning off email and app notifications can give you more control of your relationship with technology. Getting into the habit of checking your phone periodically – rather than reacting every time a notification arrives – helps you to stay present in the moment.

## 7. FEED THE BIRDS

Food's hard to come by for wildlife in winter, so helping our feathered friends is a very worthwhile reason to put down those devices and reconnect with nature. Fill a bird feeder in the garden or take a snack for the ducks in your local park (but ditch the bread in favour of oats, rice or birdseed).

## 8. SET DAILY LIMITS

Many apps and devices let you set reminders to let you know how long you've used them for that day. Setting daily limits puts you firmly in charge of your time and will help to ensure you don't miss out on any family Christmas memories because you're engrossed in your phone or laptop.

## 9. GET ON YOUR BIKE

Exercise, such as going for a run or a bike ride is an excellent way to burn off some of those Yuletide calories while giving your brain and eyes a break from screen-based activity. Physical exertion also helps reduce anxiety and releases endorphins which can improve your sense of wellbeing.

## 10. MAKE TIME FOR YOURSELF

There can be a lot of pressure to meet up with friends, make video calls and check in with people at Christmas – but remember that you need time to relax as well. Don't feel guilty about not replying to messages and emails immediately – the holiday is your chance to drop down a gear or two.
